I know there is some interest in doing a float this Saturday, so I decided to make this post to try to organize it.

Everybody is welcome.

My thoughts are we put in below the Bowmanstown Bridge (rt895). We can meet here at 10:30, and hopefully be on the water by 11-11:15. We then can float to Walnutport. If we hit some really good hatches and it takes us too long on the Bowmanstown-Palmerton Stretch, we can take out at the Gap Nature Center. Easily leave one car there to run people down to Walnutport to bring the vehicles back. I doubt this will be needed.

You can expect varying caddis, hendericksons, quill gordons, and blue quills.

Chime in if interested.

I know for certain I will be floating with 2 other non board members. Would be nice to have a gigantic flotilla.

63 degrees and partially cloudy. light wind as well.
