A friend and i got over to Bobs creek in Bedford county yesterday . i was totally skunked . my friend got one decent stocked brown on a wax worm imitation. There was a hatch that went on all day of a small light slate gray mayfly but the trout were paying no attention and there were quite a few trout but they must have been full . they were all laying on the bottom like rocks and would not move for anything. Still had a GREAT day and i might go back today. I'll keep yinz posted.....0
