Riverwhy - I helped you and Jeff haul more than a few pine trees from Elizabeth Farms to the lower Segloch as part of the original Donegal TU improvement project. Later they came in with equipment, rock, etc. and did even more work on that little stretch that goes through the farm. Not sure there was any value to it in the long run.

Haven't fished Segloch in a few years. The sandstone silt was always bad. Those NorLanco streams in the furnace hills deserve more attention from conservation groups than they get.
