hmmm, interesting, i just got my heat shrink in the mail today 20' of each 3/32", 1/8", 3/16", and 1/4" shipped priority for just under \$16. so i'm gonna put a loop on my risen line tonight. i'll let you know how it goes.

another thought i am having is "tying" the lines together, hopefully cutting through the poly body of the line to tie the two core lines together and then while melting them together hiding most of my line tying. and making an even stronger loop.
