What is the warranty on the cabelas rods? If you are looking to go a less expensive route check the TFO rods. They have a great warranty program. John, I am originally from Howard, PA and live in Upstate, NY now. I would recommend at least a 9 wt. for the Salmon. For Steel Head I use an 8 wt. I noticed you are from Lock Haven. I still have a camp on Beech Creek Mountain and I was out there fishing the first day of Tout in PA. I plan to make another trip down sometime and fish Baker Run up to where Rock Run and Tarklin Run come together. It is only a short walk from there to my camp. I understand you are looking to save some money, but make sure the rod has a good warranty incase you snap it on one of those 30 lb salmon. Salmon fishing is fun, but if you fish in town it will be extremely busy in September. It often reminds me of everyone from Clinton and Centre county standing around drinking beer and fishing. Let me know if you have any quesitons.
