My son lives in Reno and I fish Pyramid Lake and it is a very cool place. Desert scenery, alkaline water with a pH of 9.4 (I'm not sure you could pour it down a drain in NJ) and monster fish. They call the juvenile ones around 20" "shakers" and when us tourists look amazed at a 2 foot cutthroat the locals just say put that shaker back.

But there is no fishing in July; the season is October through May.
