Fished the upper section as there were cars parked at the lower section. WT was 50F when I started at around 10A. Caught a mix of browns and bows on wet flies, PTs, prince nymphs and caddis. A few rises but not much going on til about 230P when a nice caddis hatch came off in the riffle I was in. When I left the stream at 430P the WT was 56F. Two anglers came in as I was leaving. Good to see the FFO getting such good use even when the ATW are open.
