Hit Breeches yesterday. Arrived at 9:30am with a friend. We fished the catch and release til about 2:30. Caught a few fish on sz 18 PTs. Lots of hits on the swing. Hooked and lost a beautiful large brown on dries 2 times in a span of 3 hours in the same hole. Fished down to the dam and on way back up noticed the same fish was feeding on the surface again after he had been stung by a sz14 parachute Adams earlier in the day. First cast with a small brown caddis and he slurped it in. Fought for about 20 seconds until he shook the hook. Headed upstream for some wild browns in the afternoon before the rain came. Great day was had. Always surprised to see how many people are fishing this stream in the middle of the week. Hope they all had a great day as well.
