Pretty close quarters in this image at the link. It's 125k acres so I'm guessin you can move around some. Jetskis and boats it says. Probably gonna regret that jet ski decision, wonder if they have a jetski specific zone. Imagine waiting to cast to one of those cruising giants and a jetski plows through. Fishing permits look very reasonable-camping too. Owned by the natives. Fly into Reno or Con Air it and go to Carson City, lol.
