John,

Only a small portion of Baker Run is stocked. Not sure what you mean by it is stocked. The only section that is still stocked is the lower mile or 2 miles before it dumps into the Susquehanna. The rest of the 5 to 8 miles is all natural reproduction brookies. From what I hear it is one of the best streams in and around Beech Creek Mountain for native brookies. The upper section. Above the gate is where I am talking about. If you look at it on a map you will see where the other streams flow into it. Clenadon Branch, Shoemaker Branch, Rock Run, and Eagleton Run. None of those areas are stocked anymore and have't been for at least 15+ years.
