Mute, I grew up a couple miles from the Pickering so have fished it off and on for over fifty years. I have caught a few small browns that were possibly stream bred though their colors didn't compare to say Valley Creek, or Little Lehigh fish. (both Limestone, however) A couple of the tribs Pigeon Run, Hartman Run) stay pretty cool and have enough gravel to support spawning so it is possible. I see the state put big fish everywhere this time around.
