I'd say #1 don't freak out because its a BIG FISH. Freaking out almost NEVER helps anything. #2 Side pressure is key. Even to the point that the butt of the rod is higher than the tip. #3 When the fish pulls, you do not. Let 'em run. #4 IMO 6X tippet is for flies smaller than 20. And honestly, I've fished 20s on 4X. The better drift you get on 6X, might be possible with a longer 5X tippet. Good Luck. Go get him again. Even big fish can be very forgetful!
