Yes. Without a doubt.

Find a Helios or Helios 2 and cast your old IM6 side by side with it. At the very least you'll notice a drastic difference in weight.

Graphite rods have been improving on a yearly basis for many years now. from one year to the next you may see only slightly improved rods come onto the market. However, after 5, 10, or 20 years the improvements add up and the differences are very noticable.
