I was fortunate enough to tie a fly at the newbie jam under the guidance of Delta Dog. I really enjoyed it.

A used tying bench and tools fell in my lap a few weeks ago. After reading about tying for a while, I finally went down to the local fly shop and bought some materials. Wooley Bugger stuff of course. The first tie was frustrating but turned out okay. The next 5 or so got better.

When I was done my daughter wanted to give it a shot. She came up with a "humming bird" fly and we both had a bast while she tied it.
