I crossed over Stony Creek heading west on Route 30 around 6:00pm Friday evening, 4/26, and can attest to this hatch. Not sure if they are grannoms but definitely caddis. I was stopped at the light before you get to 281 and they were swarming everywhere.

I've only fished Stony Creek a couple of times in the summer and that was upstream of Route 30 closer to Shanksville. There is a covered bridge over the stream here and you could park and access the creek from there. Caught plenty of fingerlings but nothing of any size.
