OP: "when I look at the really expensive ones in the shop I can't seem to feel any difference."

fwiw, the guesses I make in a shop or in the yard about how a rod will fish on a stream haven't been that good.

No fish to spook with a heavier line in the yard. And the 15-35 ft range where I catch small stream trout looks like nothing in a yard. Mostly sidearm casting out there, etc.
