I do agree. As brookie streams go, if it's the one I'm thinking of, it gets **POUNDED** and still fishes well.

There's a limit to how many should be taken, I'm sure. But a few ain't gonna hurt nothing.

I'd also point out the road that runs along it happens to be along the route from town to many other brookie streams. Did he say he got them from that stream in particular? Some of those others are stocked, as well.
