Has anyone else had any luck with warm water fishing yet this year?

Not much for me.

I usually fish the pre-spawn pretty hard for bass and this year was very tough.....probably due to very cold water temps that suddenly skyrocketed rather than a more predictable increase (at least this is my current theory/excuse). I got a few nice bass but really had to work for 'em and places that usually produce fish in March did not seem to have fish when I fished 'em. The last time I was out for bass (a few days ago) I saw male bass starting redds and when I start seeing this I usually focus on other fish until summer.

Really weird year - went from wintertime water temps to spawning in what seemed like only a matter of days(!).
