Fish cop says come on over he explains what was his story, and the fish cop says "your fishing with an invalid license!" well after threatening to take him to jail and to take his vehicle and gear

if someone can get in that much trouble over their residence paperwork, what's the penalty for poaching?

I understand how the law is spelled out. I also believe in a legal equivalence to triage. An offense like that isn't nearly as damaging to the fishery as poaching or exotic species introductions.
