What Wt is the Rod? Should be a 6wt or less for trout. Did it come with Fly line? - if so this will need to be changed out, more than likely it is old.

I don't care for premade leaders and tippits, I make my own out of Spiderwire and Flourocarbons.

I would not jump out to the store and put some money into the sport just yet. This sport can be quite expensive.

Clear water makes trout really spooky - even a shadow of the line or a splash in the water will cause them to split the scene. At this point I downsize my presentations.
