My results have been identical to Fl's mentioned above on the however on the Conestoga. I wouldnt think the fish would be very actively rising so dont go by that unless you get a crazy hatch going around you. I had to work hard for my fish and get down deep and twitch twitch twitch. I floated 15 miles of the Conestoga a week or so back on a day that was close to 70 out and didnt see 1 rising fish and only brought about half dozen to hand.
