I normally start with around 3 feet of 8 or 10 lb spiderwire. to a 4 feet of 4lb spiderwire to a dry fly and then up to 3 1/2 feet of 2lb Flouro to the nymph. This usually give me the best set up. I will normally change out the 2lb flouro if it gets a knot in it within 2 feet or less of the nymph. My two lb flouro is tied to the hook shaft of the dryfly.
