I have zero interest in harvesting any fish, even within the scope of the law. Fishing to me is a recreational endeavor, but I don't hold it against anyone who harvests legally. If I were to fish this stream, I would not harvest any fish.

The fact that brown trout are "pushing" out the native brook trout may be immaterial in a number of years as our waters warm to the point of not being able to hold trout!

Or get too cold and hinder the growth season!
