Yep. Lots of stocked brookies in this thread. Look at the fins. Then look at some photos of brookies that are definitely wild, and look at their fins, and compare.

I'm curious which you think were stocked. There are not a lot of photos in this thread..[/quote]

sarce

These are the ones I'm pretty sure about.

Look at the pectoral fins of those fish. Then look at photos of brookies you know for sure are wild brookies, and look at THEIR pectoral fins, and compare.
