I've left the house when the release was 225, stopped at circle e for lunch and headed to launch. River was blown with sheets of plywood and corn stalks closing by. Raced down river 10 miles to beat the yoo-hoo that was headed down river. There's also plans "b" and "c". Plan B is hit a different river. Plan C is head back to motel and get hammered.

Assume the worst and hope for the best. If you bank on no hatches and zero fish, you can only go up from there.
