I only dream of 30 mpg haha if i hit 15 mpg thats a good day!

that's the family wagon(sexy, really fun to drive and the damn things gonna get me a speeding ticket), but that costs a boat load less to drive to go fish than my crew long bed powerstroke(6spd, my baby), also hauls the fam and or whatever else i throw at it, but costs twice as much to go the same place on average, maybe a bit better if i can keep my foot out of it(so hard to do, i'll admit 'im a bit of a horse power junkie as well).

as for the shoot out, lucly i have not had many that bad, but i did attempt to cast a shakespeare walmart special combo once... who in their marketing dep let that out the door? absolute JUNK!

best rod...??? prob my mystic m-series 3wt.

has anyone sprawled bast just ff gear to builing gear as well? ya know a wood lathe for handle turning, loads of diy rod building goodies, and now working into bamboo lol. but at least the bamboo got partially side lined by the fishing coming back locally anyways?
