Just to be clear, I am not giving advice that a non-resident is legal to fish with a license issued for the year (or longer) if they were a resident when they purchased it. What I am saying is that the law is not clear, and, in fact, suggests that one is not "eligible" for a non-resident license once they have purchased a resident license. And I draw that from the language of the laws I quoted.

The criminal law is supposed to clearly define legal/illegal and these do not do so in my opinion. And, again, there may be something I am missing.
