I really like UTC thread. They are much stronger than the monocord threads but similiar to tie with. Uni is pretty strong too, but it doesn't flatten as nicely as the UTC and tends to build up bulk quicker.

It should also be mentioned that not all 6/0 threads are the same diameter. Uni 6/0 is heavier than Danville 6/0, and the Uni 3/0 is seriously bulky stuff. (UTC measures their thread in denier rather than X/0)
