I have access to a few private ponds, I was thinking of going out and catching some Largemouth on flies. Basically, Where do I start? I'm reading about pond and lake ecosystems and the bug life with in. What flies should I be looking for purchase? And am I going to need a heavier weight rod to cast them out there (I have a 8.5 5 wt)? What about leader combinations and tippet?

Thanks for the help! It looks like a fun Summer coming up!

Paul
