At different times I've forgotten - wading boots/waders, reel, flies, line tray....

Only without the reel did I not fish. I did consider going to a local store and buying one spooled but nixed it.

That was the longest two hour drive home...

Now I have a list and everything goes in a crate the night before. I'm superstitious and NEVER pack the car the night before as I either get busted by the weather or the fish if I did.
