I confronted a person one day that was fishing and wanted one of my catch a release trout. He did not have his fishing license visible. As far as I was concerned he was poaching and I was not going to give a poacher an easy fish. After some else starting asking also, he produced. We informed him that the license needed to be visible at all times.

When I was in MO at the fishery (March), I noticed a number of fishing rigs wrapped around a powerline over the fish holding tanks. Definitely poaching was going on there.
