Bug Band, as someone mentioned. I used the bottle spray, and it works against ticks and mosquitoes very well. It is made with Geraniol and it definitely does the job. I spray all points of access for ticks: belt, neck, cuffs, wrists, and I do not find them on me, where I was covered previously.

I lather it all over my face, neck, legs and hands for mosquitoes and they do not bite those areas. Some people do not like the smell; it's a coniferesque aroma.
