I fished the "swarm" tonight. I had them emerging on me, my kayak, my extra rod, and anywhere else they could go. The surface activity was decent. I saw some dandies jump, but no big fish surface takers for me. I got 5 on the surface none over 6" and 10 on white streamers and white twisters, two were in the 16-17" range. Funny how anything white and moving stirs them up. Also the pre-hatch fishing was terrible so its a very welcome sight seeing them creating some activity.
