Rod Rohrbach was upset when first informed last week of a plan that would remove nine dams from the Little Lehigh and Jordan creeks.

I, for one, welcome our new Piscesine overlords.

I like that they rang up Rod out in CO and got him to bitch about it. Stupendous use of resources.

A year or so back, I spoke to Lee Creyer (our area WCO) about this. He feels that removal of the low head dams on the LL will allow the silt in the stream to be flushed downstream, improving habitat. I tend to agree with him.

Muskies? On 10X tippet. Good one, Rod.
