Welcome to the swingers club. I'm constantly baffling my dry fly friends by twitching, jerking, yanking, swinging, lifting, dapping, man-handling, dragging, vee-waking, and at the end of the "drift" letting it hang for an inordinate amount of time and if a fish hasn't seen it by then, repeating. I fish well into dark with my bushiest caddis and stout tippet purposely using your new found technique.
