An 8lb bass would have much bigger eyes. The one pictured above appears to have an eye size of a nickel. I've caught numerous green fish in the 5 lb range and there eyes are slightly smaller than a quarter. I agree with bigjohn.

However the OP made a good effort to hold the bass close to his body for reference. Which leads me to believe that the fish is about 19-21 inches, 3.5-4 lb range with eggs.
