glad to hear your mending, hopefully you'll be back to 100% soon. And that is one hell of a way to recover!!  
Lyme disease is scary, and lots of doctors around me refuse to think it's anything serious, and won't test for it!!!!  
I think it should be apart of a regular physical, and maybe a part of ANY visit to a doctor, if it hasn't been done  
within the past 6 months or a year.
