I could be mistaken but I think you are not allowed to wade in green lane res as it's a no swimming area. I remember a couple I know almost got in trouble there as they waded in with their dogs on a hot summer day.

I could be mistaken though, might want to call the park and double check.

Even if it's not allowed though you could probably get away with it up in the areas by knights bridge and over toward upper perk high school as I don't think it's as heavily watched as the area down toward the dam and the boat rentals.

Another good option is down in green lane at deep creek lake and even below that dam where the perkiomen continues down under the closed iron bridge.

That's my nightfishing neck of the woods and I've even heard stories of a musky or two caught down that way.

Good luck
