Where did the package ship from? I know a few people who have ordered from there and from my knowledge, they are shipped internationally and they take a few weeks to get there. hence the \$8 shipping price.

Most flies made internationally are from the same couple shops. Some of the shops are actually really great conditions for the area. The difference in the flies is they are rated and then priced accordingly. Some flies are really bad, but others are serviceable. I've heard good things about the place in the OP though for the price.

I haven't bought a fly in about 5 years, but thought about using this place if I headed out west and needed a bunch of different flies and didn't have the time to tie them.
