Skirt is the thing that goes around your waist and connects to the cockpit so no water splashes in while paddling or going through rapids. In the winter it helps to keep the legs warm by closing everything off below your waist.

Anytime you want man, have boats will travel. Hit me with a PM if you're interested. Deep creek is up here by me or I'm always willing to see new water so if you wanna take a float on the brandywine I can come down your way whenever, I'm pretty free all the time(no wife, no little-uns).
