Today was the release day for the Trout in the Classroom program at HEreford Elementary School in Berks county. The school kids endured a trying year, first only about 12 trout hatched then a second shipment of trout got ick, and the last shipment of trout there were only about 40 fish. Of the last group all of them survived. They were released in Perkiomen Creek above hte Dam in the Fly section, several darted upstream and out of site. Hopefully they will survive, but that's not the point of the program. Good luck to other TU Chapters that have fish being released soon.
