I fish a stretch downstream from twin bridges half mile or so below where lake williams drains into the S. Codorus, technically where e.codorus and s.codorus converge.

#1 fly olive wooly bugger! #8 bead head or not.

I also get some good action on hoppers and other poppers. Some luck on clousers in the fall/late summer.

Good water for smallies, rock bass and sunnys last 2 summers. PM me and we can hit it together some time.
