So my friends all want to go to see the Seven Gates of Hell. First of all, I don't tress pass onto private property, second its a myth, and third I don't hike 8 miles into the woods unless I'm fishing a small stream. I noticed the road where the gate is located is trout run rd. and there is a stream called trout run close by. I'm looking to spend my time more wisely and law abidingly and was wondering if anyone who has fished this stream has caught trout or not. Also, I was wondering if the stream is accessible or if it is posted. Any info is appreciated, thanks - John
