I have found the opposite of pittflyguy. I really prefer the furled leaders for delicate presentations.

+1

However, there are some (overly) heavy mono furled leaders out there that can turnover just about anything you can attach to your tippet. It really depends on what you buy/make.

+2

If you're talking about your typical trout furled leader that you aren't making yourself, I think they're great for delicate presentations, but lousy for turning over even bigger/weighted nymphs.
