Greenlander,

It's all part of the game. They letort gave me a good spanking tonight, but it's the fact that I know the fish are there that always brings me back. I generally stay sub-surface unless there are risers (except during terrestrial season) on the CV streams. I also prefer weighted flies - I find them easier to work in the lanes of the weeds and such. Bottom line - dont give up - when you finally have a good day in the CV, you'll feel like you accomplished something...then you'll want to do it again! Good luck!
