if you are just starting out I'd recommend a visit to a fly shop. you can ask questions about the materials and get other tips. Rabbit or beaver? partridge or grouse? Z-lon or spooled antron? Is loose muskrat fur better than taking it off the pelt? uni-thread or UTC strand thread?

Typically there is no significant savings (well, hooks and beads the exception), but you can get an education if you visit the right shop. More than beginners could benefit. I've been tying for 30 years and I recently got a great recommendation for a new style of hackle pliers from the staff at FFP in state college.
