Never fished it, it is on private property. However I did hear from someone (can't remember who) that it does have wild/native trout in it. I can't remember if they said brooks or browns. When checking out a stream on posted property, I go to the York County GIS website.

Here is the link: <http://gis.york-county.org/MapData.aspx>

Click on Assessment Data & Mapping, In the upper right hand corner change the two settings to aerial 2003 and aerial 2008

Then in the upper left hand corner click on Search and under Owner Name, type in Geesaman Carl E

Then click on one of the three addresses and it will take you to his properties, which also contain trout run. Then you will know where he lives and can go ask for permission to fish. Hope that helps and good luck
