That is a nice picture. That is ashame what happened but still you had a awesome fight I am sure. I have yet to catch a Tarpon on a fly but have caught a few on spinning gear. I will never forget my largest was around 60 pds and I can still clearly remember it coming out of the water about 5 X. I will be on the beaches of Sanibel Island with my fly rod next week trying to make a few more memories..
