Fished there on Sunday 19th. Started at Drake well around 1:00pm.

Fish took on the first cast of a caddis dry then had to work hard for the next few. Got a lot of fish to come to the fly but landed only a few.

About 4:00 pm moved down to Petroleum Center to see what was going on. Few more bugs but not many fish working them. Did see a few sulfurs and cahills. Hooked a handful of fish on a sulfur dry.

Was a beautiful afternoon.
