A guy I work with is involved with a local sportsmans club, and he told me today that they tagged three trout that were stocked in a small stream here in our area. One month later one of these fish was caught in Sunbury, this 110 miles away by road and many more by river. I thought this was an interesting story to share. I don't know of any dams between here and there on the West Branch of the Susquehanna, so I believe his story. It was a Brookie.
